PRO

# Professional Business Continuity Software

A powerful customised toolset providing savings through automation, measurement and consistency

<b>Purpose</b>	<p>Inoni Pro is a web software service delivered via the INONI platform on a partly or fully-supported basis (SaaS). It allows organisations to build comprehensive, practical and standards-aligned business continuity plans and associated tools. It provides features for communicating and updating as required under a dedicated and secure company account, hosted by Inoni.</p> <p>Pro delivers initial setup, impact analysis and continuity plans for each business unit, each location and for the organisation as a whole. The toolset is scalable and can be extended to accommodate many end-users. An account is provided for each business unit and a manager account for each major location. Additional users can be added if required. Additional functions can be added and bespoke options are available.</p>
<b>Toolset</b>	<p><b>Setup</b> Inoni supports completion of our supplied Setup tool by the customer to initially scale and configure the BCM toolset. This is accessible via the client manager login and allows import of any pre-existing location, department, application and other relevant databases.</p> <p><b>BIA</b> Captures per-process information via customisable online questionnaires that can be completed by or on behalf of business unit managers. These collect impact, timeframe, dependency and risk information, covering quantified and intangible variables. BIA delivers customisable professional change-controlled reports online and to MS Word with updating graphs and charts.</p> <p><b>BCP</b> Captures and supports analysis of all plan-related information via customisable online questionnaires. This includes data to drive all aspects of emergency or incident response, prioritisation decision support, relocation and resource allocation, objective setting and action plans, plus detailed contact lists. BCP delivers plans to MS Word, online and to smart phone.</p> <p><b>Add-ins</b> A range of customisation options and function add-ins are available, including risk assessment, crisis and incident management, ICT DR and Supply Chain, plus bespoke tools.</p>
<b>Features</b>	<p><b>Presentation</b> Familiar and minimal, with iconic menu, navigation and pinboard</p> <p><b>Evidential</b> Questions have quantified and text responses, requesting and capturing evidence</p> <p><b>Consistency</b> Data is collected via jargon-free interviews, supported by hover text and contextual FAQs</p> <p><b>Customised</b> Inoni is inherently programmable, allowing rapid customisation so it fits your business</p> <p><b>Comparison</b> It can provide scored analysis, allowing benchmarking and peer group comparison</p> <p><b>Guidance</b> Provides intelligent advice that converges users toward best practice outcomes</p> <p><b>Reporting</b> Configurable text and graphical reports are provided online, to PDF and MS Word</p> <p><b>Controls</b> Programmable workflow, calendars, review and eSignoff provide control over activities</p> <p><b>Dashboards</b> Provide management control, showing completeness, change and improvement</p>
<b>Management</b>	Managers can be assigned to oversee one or more locations or divisional groups, allowing delegation of responsibility and decentralisation.
<b>Administration</b>	Inoni provides administration for Pro. Administrators have additional access to all aspects of platform management, including audit trail, workflow and version control.
<b>Hosting</b>	Inoni's web service is hosted by our agents on a dedicated secure platform. We also offer self-hosting options under our Enterprise license scheme.
<b>Availability</b>	A standard Pro Account is typically available within 3 working days of agreement to supply.

# Providing business impact analysis and business continuity plans for your whole organisation

## Organisational benefits

- Integrity and consistency across the organisation
- Improved compliance with regulation, legal and customer requirements
- Savings through efficiency and automation of repetitive and difficult tasks
